Jon Cornella

Colorado Springs, CO | joncornella@gmail.com | linkedin.com/in/joncornella

Analytics and AI Specialist with 5+ years of experience applying data, automation and machine learning to real business problems. I design data systems and AI driven workflows that identify patterns in customer behavior, predict churn risk, and inform retention strategy. I specialize in translating unstructured and structured data into clear metrics, dashboards, and recommendations that drive measurable business outcomes.

Technical Proficiencies

AWS | Azure | Python | SQL | Power BI | Salesforce | monday.com | Jira | Claude

PROFESSIONAL EXPERIENCE

Donor Data Specialist – ***Springs Rescue Mission*** ***April 2026 - Present***

- Drove 30% quarterly revenue growth in six months by streamlining CRM workflows, training development teams, and eliminating manual processes and redirecting staff time to donor engagement.
- Cut infrastructure costs by $40K annually by migrating on-premise servers and systems to the cloud within one week.
- Led CRM architecture and data governance for 135K+ donor records, owning configuration, automation, access controls, and integrations.

Senior Technical Engineer - ***Tithe.ly*** ***September 2024 - April 2026***

- Resolved high-priority incidents and escalations for enterprise environments, serving as a trusted technical advisor while maintaining SLA compliance, operational accuracy, and efficiency in high-volume, critical workloads.
- Collaborated with Product and Engineering teams to troubleshoot complex system issues by analyzing logs, tracing failures, and documenting reproducible findings to accelerate root cause analysis and resolution.
- Delivered security-focused training on role-based access controls, permission groups, and secure data handling practices, enabling staff to operate effectively within a cloud based SaaS ecosystem and strengthening overall security posture.
